

Unmanned Aircraft Systems (UAS)

Players in the emerging unmanned aircraft systems (UAS) marketplace face far-reaching issues. FAA regulations. Intellectual property concerns. Corporate matters. Data privacy. Counter-UAV technology. Export control. Product liability. Public policy. Business strategy. We provide everything UAS manufacturers, operators, and users need to navigate regulations and risk.

Our team at Hogan Lovells understands the business of emerging technologies, chiefly UAS and drone technology, to help you take ideas from drawing board, to implementation, to global deployment.

Representative experience

Counseling companies and investors on the regulation of drones in various countries around the world.

Helped CNN secure precedent-setting FAA waivers to legally fly UAS over members of the public.

Assist several UAS manufacturers, operators, and end users on aviation regulatory issues.

Counsel companies to innovate in a safe, secure way that is amenable to policymakers.

Help companies to explore strategies to fly UAS beyond line of sight, at low or high altitudes.
