

Gaming Law

We play the game – worldwide. Having success in the gaming industry is not a result of luck, but a result of accurate knowledge of the specific market, of innovative ideas, of effort and of legal expertise. We help our clients to overcome regulatory and administrative challenges and advise on market entry strategies and regulatory requirements in the gaming industry worldwide.

The gaming market is an area of continuous development and is well known for its heterogeneous regulation all over the world. New market regulations encounter the liberalization of the gaming market elsewhere in other countries. The legislative institutions try to catch up with technological improvement or show a newly awakened concern for addiction problems and the protection of the youth. All this creates new market opportunities, as well as challenges – we keep you in the game.

With more than 49 offices across the world we have a global network of lawyers dedicated to the gaming industry. We know the risks and challenges for your business. We can help you with your domestic legal issues and any problems you have in other jurisdictions – for example, in the course of new market access and during the concession awarding processes, when local contacts are essential. You can bet on us.

Our strengths are our reliable contacts to public authorities and governmental officials. Our team includes former government officials with deep experience in this space. Therefore we are able to guide you in governmental procedures and find solutions even before you realize the
