

Regulated Industries and Utilities

Regulation is the new block; it can anchor investment or drain returns. So how do you achieve stable returns and grow?

Our leading global regulated industries and utilities team covers the full range of regulatory, development, financing, and M&A issues. We are known for taking a market-led innovative approach.

We regularly advise on the market's most high-profile deals in energy, transport, and water. Our team combines deep technical and industry knowledge with a commercial focus. We can help you prosper in your often fast changing regulatory environment. We will work with you to achieve the best outcome in your price control reviews, and optimize your business model, financing structure, and investor returns within your regulated settlement.

Representative experience

EIB on the £4bn Thames Tideway Tunnel project.

The acquisition by the Infracapital consortium of the £4bn Kelda Water regulated utility.

On the multibillion, circa 3000 km-long West African Rail Loop Project connecting Abidjan to Cotonou via Niamey.

A Singapore power generator on a gas swap of piped natural gas in Indonesia covering onshore gas transport regulations in Singapore and the Singapore Gas Network Code.
