

Aviation Legislation and Policy

Aviation is one of the most heavily regulated industries in the United States. Legislation and regulations therefore have significant implications for all aspects of the industry.

Hogan Lovells has been at the forefront of these issues for decades, advising and representing clients before Congress and the executive branch at the federal and state levels in order to shape the legislative, regulatory, and policy regimes affecting the aviation industry. From supersonic and unmanned aircraft to airlines, business aircraft operations, airports, and aerospace manufacturers, our team covers all aspects of the aviation industry.

The Hogan Lovells team's legislative and regulatory efforts benefit from the extensive experience and specialized knowledge of our pre-eminent legislative and aviation practices. Our clients also benefit from our many relationships with key congressional leaders, congressional staff, and the policymakers and staff at aviation-related agencies such as the U.S. Department of Transportation and Federal Aviation Administration.

We understand the legislative, regulatory, and policy issues and objectives of our clients. With that understanding, we assemble a team of attorneys and advisors with the most relevant experience, and then develop and implement a strategy to achieve our clients' goals in an efficient and cost-effective manner.
