

Climate Change

Advising on sustainability and the impact of climate change on society, business, government and investors.

As part of our broader ESG offering, our Business Integrity Group (HL BiG) advises governments and supranational entities on climate change policy and regulation, and advises businesses and investors on how best to position their brand, business and legal framework in this new context to drive sustainable growth.

Climate change impacts society, consumer-demand, business, government and investors of every size, in every jurisdiction and across every industry. From the Clean Air Act to the European Green Deal and the UN Sustainable Development Goals, hard and soft law in this area is growing in volume and impact. Our ESG team works across regions, practices, and offices to help clients tackle these ever-evolving challenges, and plan for those that may be yet to come.
